STEEL 1-CAR CARPORT WITH REGULAR ROOF

CALL NOW TO ORDER!

This One-Car Carport is an excellent storage solution. Fully open design for easy storage access and versatility. Steel frame walls are 1' shorter than the length of the roof. A large color selection to match your style and existing structures on your property. Great for one car, truck, or assorted lawn equipment. Avoid costly repairs and add to the longevity of your valuables with an outstanding metal building.

Our one-car carports are built with an American-made galvanized steel frame and heavy duty roofing panels. Our innovative truss design, as well as corner and center bracing to reinforce the structure, means our carports are built to last. The roof is guaranteed to be leak-free. Factory certification, commercial grade framing, and other upgrades are available to make this rugged metal building even more durable.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
