VERTICAL STYLE STEEL GARAGE

CALL NOW TO ORDER!

Store your vehicles and equipment with ease, with 520 sq. ft. of storage space for up to two cars or trucks. Comes standard with one 8'x8' roll-up door (large enough for almost any car or truck), and one walk-in door on the front wall. Customize this garage for anything you need. Adjust dimensions, add or remove doors, or change the colors – the choice is yours!

Manufactured with the highest quality materials available. The building frame is constructed with premium American-made galvanized steel. The roof and wall panels are heavy-duty 29-gauge steel sheets. We reinforce all of our metal carports with corner and center bracing on the steel frame. The vertical roof is our strongest roof option. It is designed to allow rain and other precipitation to quickly flow off the sides of the garage and reduce standing water on the roof.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
