METAL GARAGE BUILDING REGULAR ROOF

CALL NOW TO ORDER!

At 22' wide by 26' long by 9' tall, there is 572 sqft. of garage storage space. This building has two 9' x 7' garage doors with custom 45 degree openings on the 26' side wall. The regular style roof is our most economical roof option but does not sacrifice quality. Customize this metal garage for whatever you need, including choosing from our large color selection to find one that works for you.

Steel is stronger, more affordable, and requires less upkeep than wood and other standard building materials. Our metal buildings are built to last for years to come, with very little maintenance required. We only use top quality galvanized steel for our building frames. The roof and wall panels are heavy duty 29 gauge steel sheets. We also reinforce our steel frames with corner and center bracing for added strength. The regular roof is guaranteed to be leak-free.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
