ONE CAR METAL GARAGE BUILDING

CALL NOW TO ORDER!

With 572 square feet of fully enclosed storage space, there is plenty of room to store one car and extra equipment. Measures 22' wide by 26' long by 9' tall. Standard one 8' wide x 8' tall garage door, one walk-in door, and one window located along the 26' side wall. Customize the dimensions or features on this metal garage for whatever you need, including adding doors or adjusting dimensions. Choose from our wide selection of colors to find one that fits your style.

Our frames are constructed with American-made galvanized steel, and our roof and wall panels are 29 gauge heavy duty steel sheets. We also reinforce the steel frame with corner and center bracing. Galvanized steel is more durable and less expensive than wood and other traditional building materials. If you are looking for a great storage building, trust the folks from Elephant Structures!

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
