METAL GARAGE STORAGE SYSTEM

CALL NOW TO ORDER!

Dimensions are 22' wide x 31' long x 9' tall. It is built with a strong boxed eave roof and offers a total of 682 sqft. of storage space. Two separate sections for a versatile building design. There is a 22' wide x 21' long closed garage area for vehicles, with a 22' wide x 10' long open area for outdoor equipment and other various items. Adjust the dimensions, features, and colors to meet your needs!

All of our durable garage storage systems are manufactured with premium quality galvanized steel. The steel frame is reinforced with corner and center bracing for added strength. Our roof and wall panels are 29 gauge heavy duty steel sheets. The boxed eave roof has a strong design that is guaranteed to be free of leaks and other defects. When you purchase an Elephant Structure, you are getting a building that will stand tall for years to come!

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
