METAL GARAGE WITH REGULAR STYLE ROOF

CALL NOW TO ORDER!

At 24' wide x 36' long x 10' tall, there is 864 sqft. of storage space. This garage is an affordable way to get a large amount of room to store your cars and trucks. Extra space on the ends of the building for large equipment. Built with a metal roof and comes standard with a 10' wide x 10' tall roll-up door on the front wall for easy vehicle storage. There is also a walk-in door for personal use and two windows on each side wall.

Our galvanized steel is stronger, more affordable, and requires less maintenance than wood and other traditional building materials. Our roof and walls are constructed using heavy duty steel sheets. We also reinforce the steel frame with extra bracing in the corners and center for added strength. The regular metal roof has overhangs that connect to the side wall panels for a leak-free finish.!

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
