### 3-CAR METAL BUILDING GARAGE

**CALL NOW TO ORDER!**

Our 3-Car Metal Building Garage is quality made to withstand all Mother Nature can throw its way. The building is spacious enough to house almost any vehicle, not including larger recreational vehicles or commercial equipment. We also offer anchor options for our buildings, but it's important that you check with your local building inspection to see what certifications are necessary.

Our garages and metal buildings can also be transformed into work stations or play areas with adequate supervision. Don't let the steel fool you. These buildings are uniquely designed to keep your work or place area cool during those hot summer evenings. This building features three garage doors that are each 10x10. A 36' x80' access door is also included.

#### LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
