METAL STORAGE BARN WITH LEAN-TO

CALL NOW TO ORDER!

This Ridgeline Barn is an economical solution to protect your cars and equipment. This barn style building includes a closed center structure and lean-to, with one open lean-to for versatile storage. The center structure measures 24' x 21', while each lean-to measures 12' x 21'. With 1,052 sq. ft. of storage space, it can easily fit four cars or trucks. It is also a great way to store large amounts of equipment.

If you live in an area with harsh winter weather, or if you need a building to withstand the toughest of tests, ask about our factory certification. Our certified buildings have extra leg bracing and include anchors for proper grounding, making them some of the strongest buildings available on the market. Certification also means your building is guaranteed to meet or exceed your area's structural requirements.

48' WIDE x 24' LONG x 11' TALL

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
